IMPLEMENTING PSM PROGRAM
CERTIFICATION PROGRAM IN PSM IMPLEMENTATION

DATE
Sept 23rd - 25th 2019

VENUE
HOTEL KOHINOOR CONTINENTAL, MUMBAI
Andheri-Kurla Road, JB Nagar Andheri- East
Mumbai- 400059
Some of the major disasters which include the 1984 Bhopal Gas tragedy incident in India, resulting in more than 2,000 deaths; the October 1989 Phillips Petroleum Company, Pasadena, TX, incident resulting in 23 deaths and 132 injuries; and the May 1991 IMC, Sterlington, LA, incident resulting in 8 deaths and 128 injuries, drew international attention to the potential for major catastrophes.

In response to such concerns OSHA brought the PSM Standard 1910.119. And CCPS has brought in RBPS. While some changes were ushered in since these disasters, and industries generally know how to complete a process hazard analysis (PHA), management of change (MOC), an incident investigation, etc., what is incomplete is the ability to ensure comprehensiveness, continuity and completion in implementing PSM successfully. It is imperative that you have a functional process safety management (PSM) program for deriving benefits.

The course explores key elements of a comprehensive PSM program and how the overall architecture applies to each element, the challenges, way forward and the role of leadership.
ABOUT CHOLA MS RISK SERVICES

Cholamandalam MS Risk Services Ltd., is a 50:50 joint venture between the INR 300 billion Murugappa Group and Mitsui Sumitomo Insurance Group, Japan. With over 200 risk engineering experts, we are the largest employer of Environment, Health & Safety specialists in India and offer comprehensive risk management and engineering solutions.

With two decades of experience and over 8500 consulting projects we are able to offer best in class, customized services to organizations to optimize their EHS performance, and set new benchmarks in safety performance.

Since our inception we’ve had the experience gathered from across 42 sectors including Automobile, IT/Telecom, Pharmaceuticals, Fertilizers, Chemical, Power Plants, Oil & Gas, Cements, Construction, Textile, Retail etc.

Specifically in PSM, we are proud to say that we have the experience of conducting PSM gap analysis & implementing PSM in one of the largest oil refineries in India, besides Storage terminals, Chloralkali industry etc. Our trainers have the experience of conducting PHA both in India and overseas.
